

# S8 Statement GMO

1. AquaGen Europe supplies Atlantic Salmon (*Salmo salar*) and Rainbow trout (*Onchorhynchus mykiss*) of Norwegian and Scottish origin only.
2. AquaGen Europe declares that eggs from their breeding centres and contracted multipliers have not undergone any form of genetic manipulation or modification by means of transgenic methods and are produced under the best natural conditions for salmonids.
3. AquaGen Europe declares that eggs from their breeding sites and contracted multipliers have not undergone any chemical or hormonal treatments that are against the current Norwegian laws and regulations for such treatments.
4. The Brood fish and egg production in AquaGen Norway is certified according to the Global G.A.P AB OPT 1 without QMS (GGN 4049929687783) and ISO 9001:2015 (certificate number 2006-OSL-AQ-7777). The Brood fish and egg production in AquaGen Scotland is certified according to the Global G.A.P AB OPT 1 No Multisite (GGN 4059883729870) and RSPCA Assured Farmed Atlantic Salmon (4684.0002F S.G, Holywood).

Yours sincerely,

AquaGen Norway
