

S8 Statement GMO

1. AquaGen Europe supplies exclusively Atlantic salmon (*Salmo salar*) and rainbow trout (*Oncorhynchus mykiss*) of Norwegian and Scottish origin.
2. AquaGen Europe confirms that eggs produced at its broodstock facilities, as well as eggs supplied by approved and contracted multipliers, have not been subject to genetic modification or gene editing, including transgenic techniques or other methods covered by applicable GMO legislation in Norway, the European Union and the United Kingdom¹.
3. AquaGen Europe further confirms that genetically modified organisms (GMOs) are not used in its breeding programs, broodstock management or egg production.
4. AquaGen Europe confirms that eggs from its breeding facilities and contracted multipliers have not been treated with chemicals, hormones or veterinary medicinal products that are not permitted under applicable Norwegian, EU or UK legislation and regulations.
5. Broodstock and egg production is certified as follows:
 - AquaGen Norway:
 - GLOBALG.A.P. AB OPT1 without QMS (GGN 4049929687783)
 - ISO 9001:2015 – Quality Management Systems (Certificate No. 2006-OSL-AQ-7777)
 - RSPCA Assured Farmed Atlantic Salmon (Certificate No. 5261.0001, Barstadvik)
 - AquaGen Scotland:
 - GLOBALG.A.P. AB OPT1 No Multisite (GGN 4059883729870)
 - RSPCA Assured Farmed Atlantic Salmon (Certificate No. 4684.0002F S.G, Holywood)

Yours sincerely,

AquaGen Norway
